Tim-On the Animas site, please check with Libby and Cynthia before anything is posted or taken down. It is so closely linked with GKM web content, we need to be aware of any changes.
Thanks!

Subject: RE: gkm website -- animas animas cercla website

Update -- I was just informed that there is a link from GKM website to the Upper Animas Mining site – so there are links in both directions.

So, there may be no to do here – except to be conscious of how the upper animas site is being maintained in terms of things going up and down on the site.

Thanks ng

Subject: gkm website -- animas animas cercla website

Hi all –

See the email traffic below – just checking in to make sure all eyes are on the fact that in addition to the gkm website – there is an upper animas cercla website - <http://www2.epa.gov/region8/upper-animas-mining-district> -- that is maintained by the region. Wanted to make sure that we are thinking about how the latter is being updated so we are aware. Also the upper animas site links to the GKM site, however the reverse link is not activated (not suggesting it should or should not be, just getting everyone up to speed).

Melissa – I hear that you were looking at this early on – so if decisions were made, just let us know. However we need to be cognizant of what changes have been made to the site since August 5 – which I believe are none (Cynthia Peterson, can you confirm?).

Thanks

ng

Thanks Joan.

I talked with Cynthia about this site this morning and raised questions about how this site was being managed vis a vis the GKM site. Evidently this site links to the GKM site – and there is no link from the GKM site to the Upper Animas site, which I don't know whether makes sense or not. I will send this to the eoc pio to evaluate, and in the meantime let's not do anything to that site.

Thanks

ng

Cynthia: Thanks for this. Several answers, again, suggest some bias in favor, or an expectation of NPL listing. I can wordsmith these a bit (changing woulds and wills to cans and mayes) for the talking points. Paula, are you pulling the TPs together as Cynthia suggested? Thanks everyone, for your contributions.

I see in a draft answer that you are proposing to add documents to the Upper Animas CERCLA website. Please do not post new documents on that web site without ensuring they also go through the GKM web site posting process. Are those site assessments mentioned in this attachment on the GKM web site already?

Attached is Paula's language including my edits. I believe she is pulling these talking points together.

All,

Attached are some draft bullets to include in the section titled "Community Involvement Approaches/Authorities." Please edit as needed.

Thanks!

Importance: High

All, thanks for the effort here, but it reads to me like an advocacy paper for NPL listing, which is not our goal for the meetings. Here's a suggested outline for the TPs. I've also added LEP, which I think can probably readily provide TPs on many of these items.

CERCLA/Superfund

What is it? What is its purpose?

1. Removal authority
2. Remedial authority
3. NPL

How does it work?

1. Removal process
2. Remedial/NPL process

Examples in our Region

Limitations for NPL sites

1. Long term funding
2. Multiple PRPs
3. Orphan sites
4. Geography/Area of Impact
5. Cleanup goals

Community Involvement Approaches/Authorities

Community specific concerns

1. Silverton soils
2. Downstream interests
3. Site name

Is it possible to turn around a new draft by 1pm? If not, please tell me when. We need to get this to OSWER asap. Thanks. Joan

Attached is the draft talking points for Mathy & Shaun's visit to San Juan County on Wednesday. There is one statement in the text that should be confirmed with David Ostrander or someone else in the Removal Program on the current discharge from the Gold King mine.
